PROJECTS

HI-CARE

Github(<https://github.com/akash99909/akash99909.github.io>)

- A crud based web app which is created with python and django.
- In this Web app a user will arrive and able to take appointments from doctor and there is an admin which will manage all the patient and the doctors. This app helps to manage all the hospitals to manage their basic needs.

HI-CARE

Github(<https://github.com/akash99909/Audience-finder>)

- A web app which scrapes the data from online server in a form of csv.
- With help of this app you can target your right audience and find a way to contact them.
